

Four in a Row – Phase 4 Initial Blends

You will need:

- two players
- two colours of counters

Game Instructions

1. One player goes first and picks a square with a word on it. The player must say the word with the Phase 4 initial blend.
2. If said correctly, the player then puts down their counter on that square.
3. The other player picks a square and the method is the same as above, but using a different coloured counter to the first player.
4. The aim of the game is to get four of your counters in a row either vertically, horizontally or diagonally. The players must try to stop the other player achieving four in a row by blocking them, while also trying to get four in a row themselves.

Four in a Row

Try to get four of your counters in a row. They can go vertically, horizontally or diagonally.

blink	thrill	creep	swim	glad
flag	tree	string	drop	print
